SELECTED AI PROJECTS

Small-Agent QLoRA | github.com/kolihhan/small-agent-qlora

Python · Qwen3.5-9B · QLoRA / PEFT · Transformers · llama.cpp · GitHub Actions

- Post-trained a Qwen3.5-9B tool-using agent with QLoRA/SFT, using failure analysis to design state-aware corrective supervision; raised exact success from 34.5% to 62.0% on a frozen 200-task closed-loop evaluation.
- Validated behavior on GAIA100: v3B improved accuracy from 9% to 18%; v3D held 18% but exposed an over-search / failure-to-finalize regression, which the final analysis preserved rather than hiding.

Semantic Text-to-SQL | github.com/kolihhan/semantic-text2sql-agent

Python · FastAPI · LangGraph · SQLite · Qwen3.5-9B

- Built a local Text-to-SQL service with schema grounding, deterministic verification, bounded repair, and read-only SQLite execution, keeping operational reliability separate from semantic correctness.
- On a frozen 100-query BIRD DEV set, verification and repair improved conservative execution success from 75% to 90% and EX-compatible match from 33% to 39%, with 6 wrong-to-correct recoveries and no correct-to-wrong regressions.

EXPERIENCE

Kahap Inc | Software Developer (Part-time) **Aug 2022 - Aug 2026**

- Owned end-to-end development and production maintenance of a feedback platform covering submission workflows, automated notifications, administration, deployment, and ongoing operations.
- Extended a Laravel/Vue.js career platform and resolved production issues across application logic, databases, queue workers, scheduling, SSL, and server migrations.

Pac Com Solution | Full-Stack Developer Intern **Jun 2021 - Jan 2022**

- Developed and maintained Laravel/Vue.js features for a production POS system.
